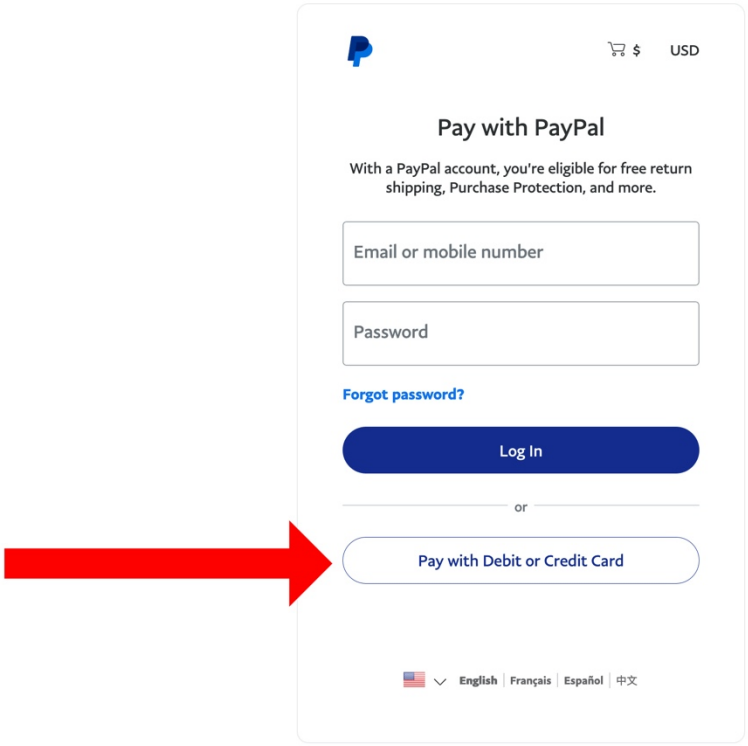
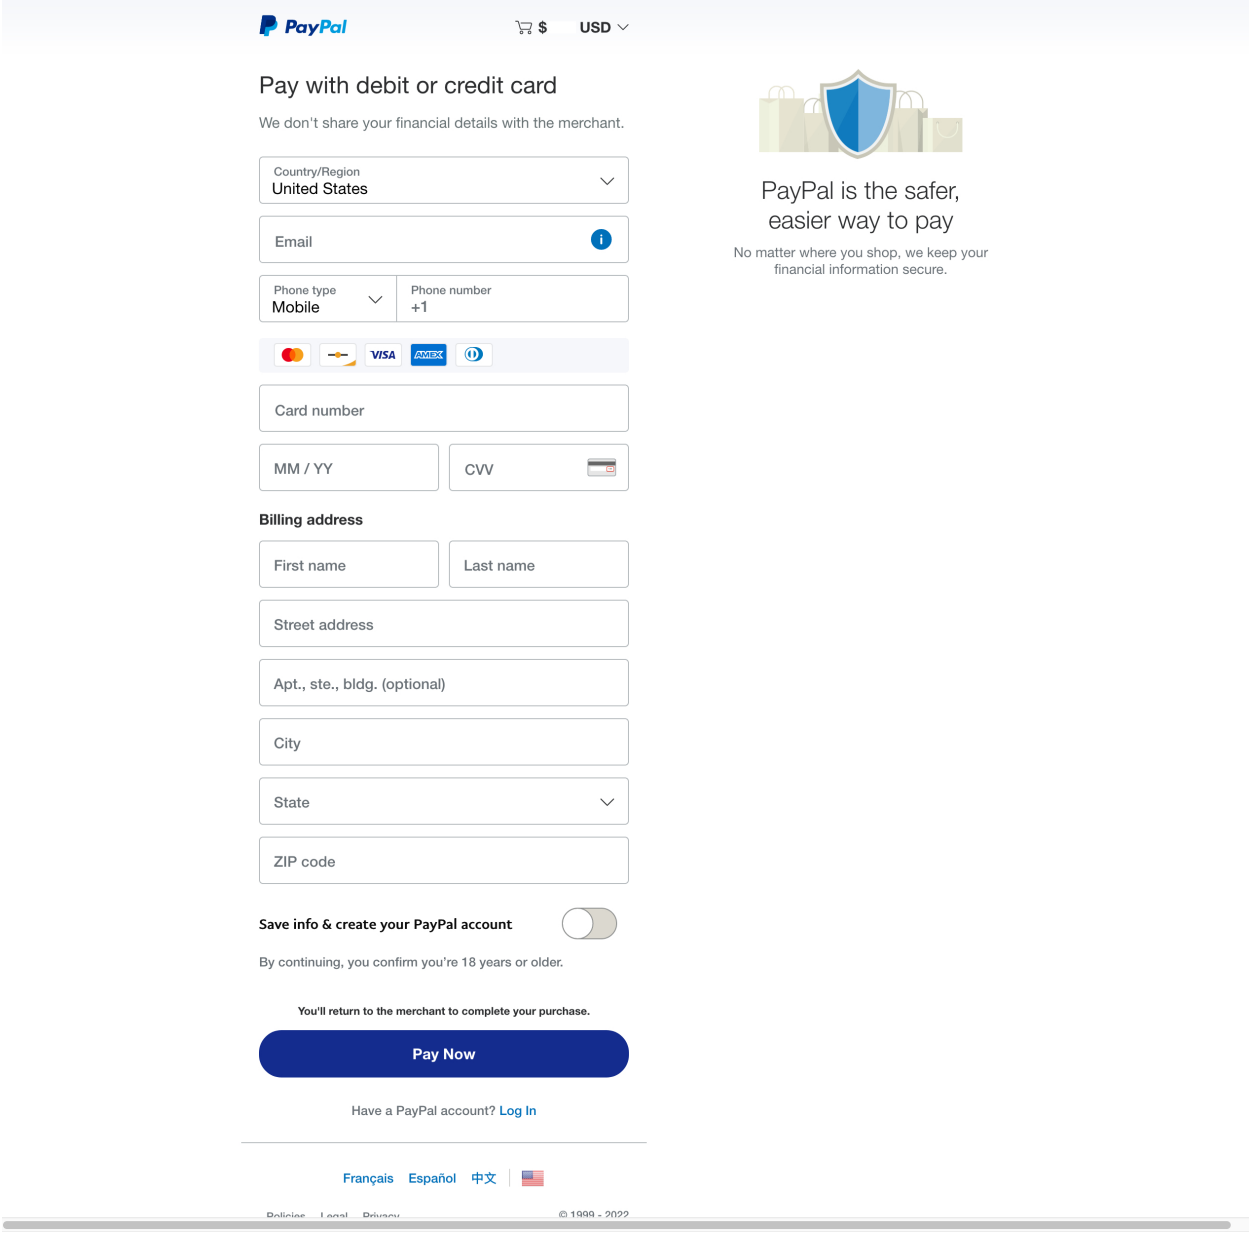
How To Pay With A Credit Or Debit Card (Without PayPal Account)

It is very easy to pay online using a credit or debit card without a PayPal account (or without using a PayPal account that you may have but choose not to use.) We do use PayPal to securely process credit cards online without retaining information.

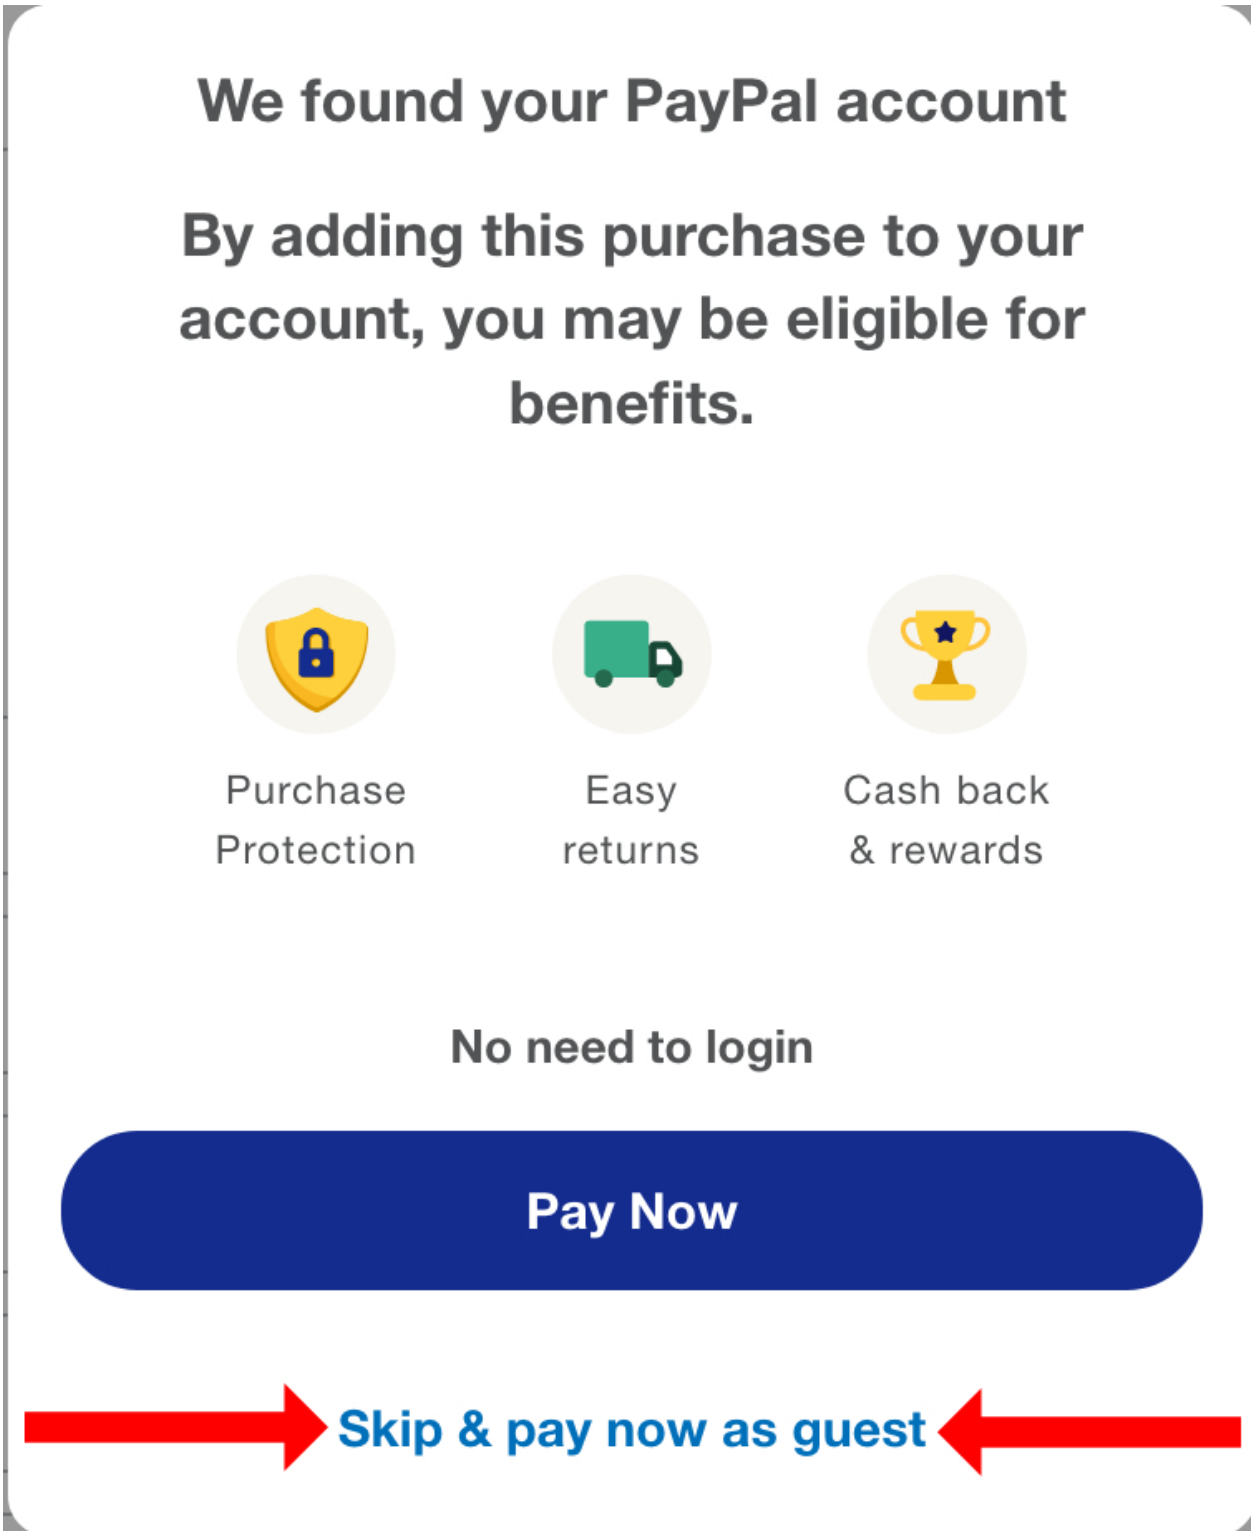
First, click on the Pay Now button on the appropriate page. You will be taken to the below screen. Click on the “Pay with Debit or Credit Card” button as indicated by the red arrow below.



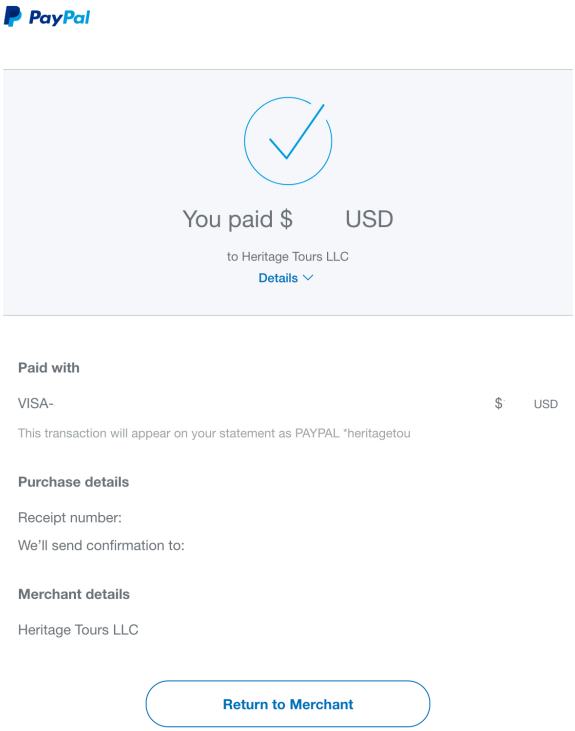
You will be taken to this secured page where you can enter your name, address, credit card number and other information. Make sure the switch next to “Save info & create your PayPal account” towards the bottom stays gray with the circle to the left to ensure you do not make a PayPal account. Once you have correctly filled out the form, click the Pay Now button at the bottom.



If PayPal detects a match between your information and an existing PayPal account, this window will pop up. You can click the “Skip & pay now as guest” line (noted by the red arrows in the picture below) to continue without logging in to your PayPal account. If no PayPal account matches, you will not see this.



In either case, if your payment was processed successfully, you will see this screen. You can print this out for your records (though a copy will be sent via email). Please click the Return to Merchant button at the bottom to return to our site and complete the transaction.



That's all! You've now paid using your credit or debit card without a PayPal account.
